

**UNEMPLOYMENT AND ECONOMIC POLICY IN MOROCCO:
A DETERMINISTIC AND STOCHASTIC ANALYSIS**

Baijou Ahmad

Morocco is facing the dilemma of unemployment for all categories of the population. The Moroccan Policy analysis is undertaken to decipherer the origin of the shortage in demand for labor. The deterministic, Interaction, an stochastic modeling are used for the purpose of the study. The primary results show that private investments (I, FDI, Inf) are the most macroeconomic indicators that affect unemployment in Morocco. This abstract is subject to changes later.
